

# GAYATHRI SRIMAI B

gayathrisrimai1811@gmail.com | LinkedIn | GitHub | Hackerrank | Leetcode

## OBJECTIVE

Aspiring Software Developer with a strong foundation in Python, SQL, and software engineering principles, and hands-on experience in machine learning, computer vision, and data-driven problem solving. Skilled in developing and deploying end-to-end AI and software solutions, I aim to leverage my analytical mindset and technical expertise to build innovative, efficient, and scalable applications. Passionate about contributing to dynamic teams that drive impactful technological advancements across industries.

## EDUCATION

|                                                                                                             |                                   |
|-------------------------------------------------------------------------------------------------------------|-----------------------------------|
| <b>Jeppiaar Institute of Technology</b><br><i>B.Tech in Artificial Intelligence and Data Science - 8.35</i> | Kanchipuram, India<br>2022 – 2026 |
| <b>Parvathy's Anugrahaa International School</b><br><i>HSC - 89.4%</i>                                      | Dindigul, India<br>2020 – 2021    |
| <b>KCM Matric Higher Secondary School</b><br><i>SSLC - 95.4%</i>                                            | Dindigul, India<br>2018 – 2019    |

## TECHNICAL SKILLS

**Programming Languages:** Python, SQL, R  
**Software Development:** OOP, APIs, GUI Development, Version Control (Git, GitHub)  
**Machine Learning:** Regression, Decision Trees, Clustering, Model Evaluation, Feature Engineering  
**Data Science Tools:** NumPy, Pandas, Scikit-learn, Matplotlib, Seaborn, OpenCV  
**Computer Vision:** Image Processing, Haar Cascades, Image Enhancement, Object Detection  
**Data Visualization:** Power BI, Matplotlib, Seaborn  
**UI/UX Design:** Blender (3D Modeling), Figma, Canva

## EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                          |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------|
| <b>Machine Learning Intern</b><br><i>National Institute of Ocean Technology</i>                                                                                                                                                                                                                                                                                                                                                                                              | 09/2024 – 11/2024<br>Chennai, Tamil Nadu |
| Enhanced object detection accuracy by 20% through advanced image preprocessing (filtering, denoising, scaling).<br>Prepared datasets, cleaned data, and trained machine learning models using Cascade Trainer GUI with 14 iterations.<br>Developed an offline-compatible GUI for object detection, transitioning from Figma to PAGE for improved usability.<br>Strengthened expertise in computer vision, machine learning, and GUI development for real-world applications. |                                          |

## PROJECTS

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                   |
